1. Verification Module

This module will be provided to the verifiers of the Jan Aadhaar Enrollment/Editing users. User authentication will be done through their SSO Id's. Based on the verification of Enrollment/Editing requests by the verifiers, data will be moved to the Golden Records in Jan Aadhaar Resident Data Repository. Verifier will be shown only those records for which documents have been uploaded by the citizens. The details which are getting verified through the department APIs will not be sent to verifier for verification. However, verifier will be able to view those details in his login. Below will be the process of verification.

2. Pre-requisite

- Verifiers SSOID must be mapped with Jan Aadhaar.
- Verifiers must have knowledge to process the application

3. First Level Verification

3.1 Login through SSO (Single Sign-on)
